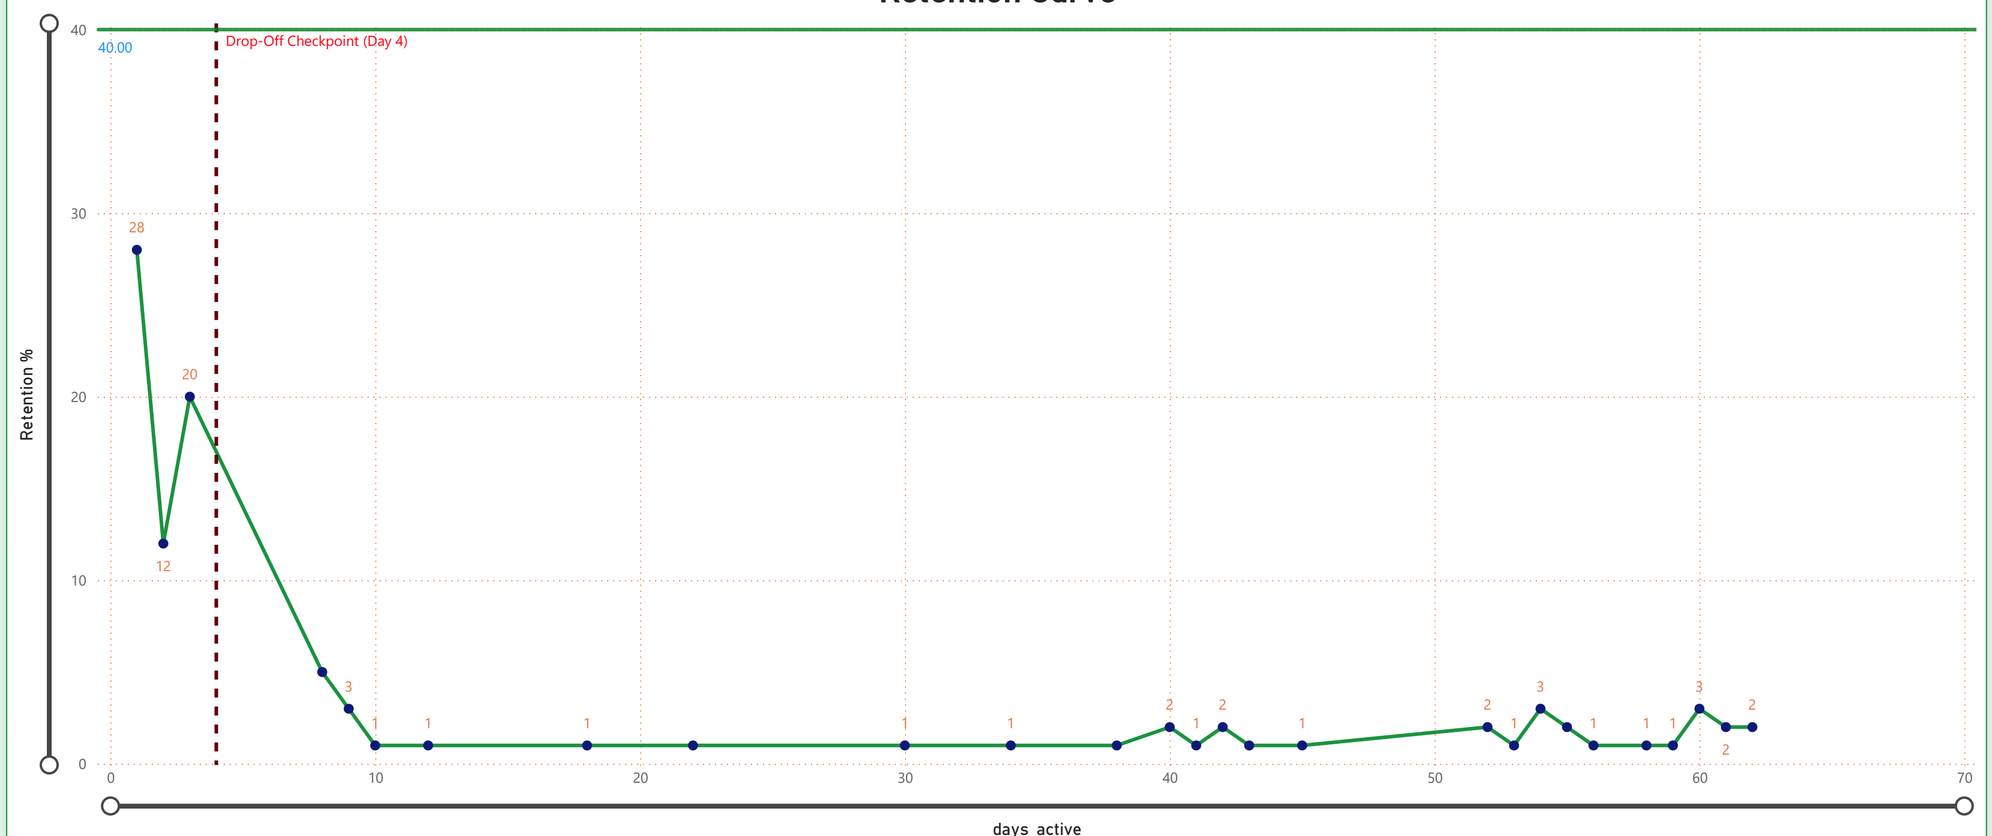
Retention Curve



Insights

Strong early activation (Day 1–3), but retention declines sharply after Day 4 — this indicates a habit reinforcement gap during the critical engagement window.

FitTrack – AI Impact & Upgrade Readiness

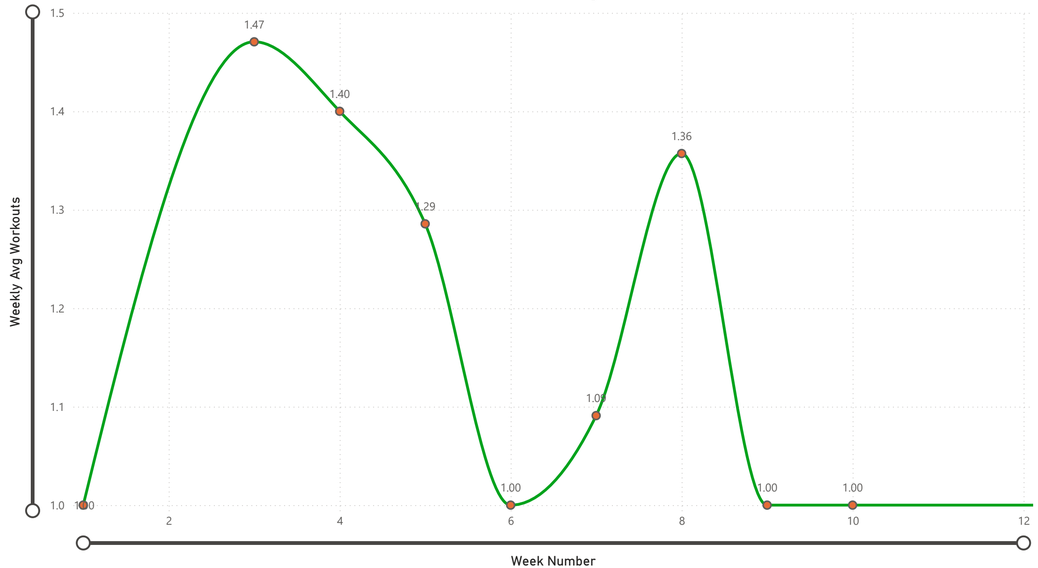
Workout Consistency Trend



Insights

No users are currently in developing stage (4–7 days). There is a progression gap between casual and habit builders.
Majority users are in casual stage, with limited transition into developing segment — habit reinforcement programs required.

FitTrack – Churn Risk & Growth Strategy

Where are we losing users and how do we recover them?

High Risk	60		**60**
Low Risk	40	40	**40**
Total	**100**	**100**	**100**

Strategic Growth Recommendations

1. Activate Day 3–Day 5 Intervention Campaign (Push notifications, habit nudges)
2. Incentivize AI Feature Trial for Casual Users
3. Introduce Streak Rewards for 7-Day Milestone
4. Trigger Recovery Flow for Inactive Users
